

317

Active four way distribution box

Up to 25 devices on the same BUS riser (100 apartments)

Improved video signal amplification

Simplified 3 level video amplification settings (low, medium and high)

Green LED for BUS voltage signal

Red LED for BUS output short circuit indication

Electronic short circuit protection to isolate the device from the bus allowing other devices to continue operating normally

Technical characteristics

Device type	Active four way distribution box
LED's	BUS voltage signal (green) Short circuit signalling (red)
Adjustments	3-level amplification via jumper (low, medium and high)
Protections	Electronic short circuit protection to isolate the device from the BUS riser
Power supply	Supplied by the BUS
Housing	Plastic box
Size (mm)	70 x 110 x 30
Mounting	Wall mount
Working temperature	-20° +60°C

Art. 317 connects to the 2-wire BUS and allows the connection of four devices (intercoms or videophones).

An Art.317 is required for every 4 intercoms/ videophones.

If there is a problem on an intercom or videophones, the Art. 317 will isolate all 4 units connected to it without affecting the functioning of the rest of the system.
